

Towards Successful MyID Implementation and Organizational Intelligence

using Gatekeeper and Vanilla

MyID

- An initiative for Malaysian citizens to use IC number as the only reference for dealing with Government services

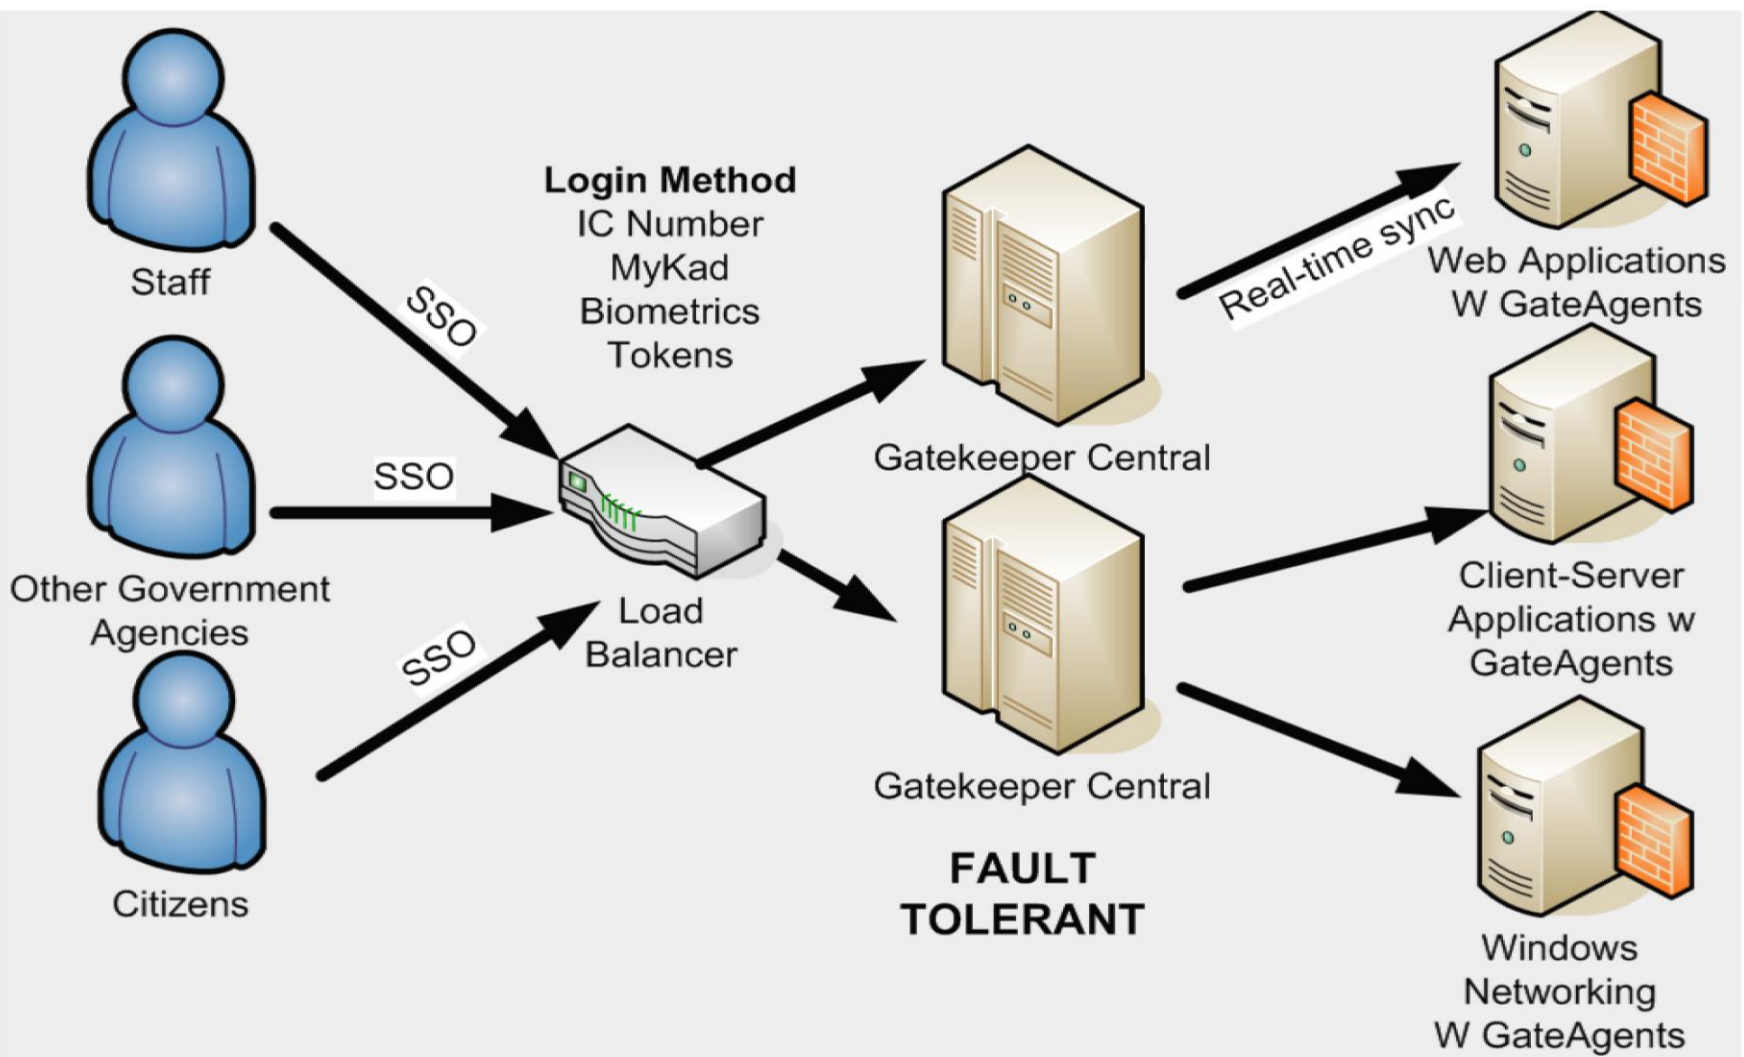

Identity Management

- Manage identities CENTRALLY from various sources especially applications, databases and directories
- Enables Single User ID/Password for Single Sign On, Central Security Enforcement, Central User Provisioning etc

Implementation

- Implement Identity Management System that uses IC Number as a User ID to access any system
- User IDs/Passwords in existing systems such as emails are still preserved

MyID and Identity Management

User Landscape

Decide Authentication Sources: Staff, Other Government Agencies, Citizens (LHDN)

Generate IC Mapping if necessary

Integrate With Authentication Sources

Sync User Profiles if necessary

Embed Gateagents in existing apps

MyID Transformation Methodology

	Gatekeeper Community	Gatekeeper Enterprise
Single-Sign On	Only Web	Web, Client-Server, Windows Networking
Access Dashboard	none	One-Click to Access
Central Security Enforcement	None	Password Policy, Access Attempt, Acc Suspension
Aggregated Authentication Source	Sequential	Targeted
Collaborated Access Control	None	Central + Applications
Central User Provisioning	None	Central Registration, Archiving
Profile Aggregation & Sync	None	Supported with tools
One-Stop Center View	None	Mashlet of Apps Snippets
